

## Electoral Operations System

**The system for operations enables the tracking of electoral processes from a command center, allowing to manage the pre-electoral tasks, and the advancement of them towards the election day.**

Allows integral coordination of different areas for solving any issues, management of the technical support workers that are spread out in the different voting precincts, and provides useful information to the electoral committee.

### CONTROL PANEL

Tool for visualizing at the command center all the retrieved information from the election enclosures, in order to monitor the development of the electoral process and deal effectively with all possible contingencies.
